Allegorical Figures in Baroque Art

In the _____ era, art was filled with drama and emotion. Artists used _____ and shadow to create intense effects. Allegorical figures became popular, representing abstract ideas like _____, justice, or death. These figures were often depicted in _____ poses, showing movement and energy. A famous painting might show _____ with a set of scales, symbolizing fairness and balance. In another work, _____ could be seen as a skeleton holding a scythe, reminding viewers of life's fragility. _____ like Caravaggio and Rubens mastered this style, bringing allegorical figures to life with vivid _____. They portrayed _____ and legends, blending them with real-life emotions. For instance, a painting of _____ would not just show the goddess of love but also convey the complexity of human affection. These artworks often featured _____, such as light against dark or calm amidst chaos, highlighting the drama of the scene. Baroque art aimed to evoke a strong _____ response, making the allegorical figures resonate with viewers on a personal level. Through these depictions, artists communicated _____ about morality, life, and the human experience.
