Ethnography and Discovery

During the _____ of Discovery, explorers set sail from Europe to find new lands. These journeys were not just about finding _____ or new trade routes, but also about understanding the _____ they encountered. Christopher _____, for example, documented the lifestyles and customs of the people he met in the _____. Another explorer, Vasco da _____, navigated around Africa to reach India, where he observed a variety of _____ practices and social structures. These early ethnographers were amazed by the _____, art, and rituals they found, which were often very different from their own. The _____ they traveled on became mobile observation platforms, where notes were taken and sketches made of everything new. In _____, the Portuguese encountered the Tupinamba, a group with distinct social norms and _____. Back in Europe, these observations were compiled into _____ and books, sparking a fascination with exotic lands and peoples. This period significantly contributed to the field of _____, the systematic study of people and cultures. It marked the beginning of a more detailed understanding of global _____, although not without its ethical and moral complexities.
