Geography

Tasks:

1. Write the words in the correct gaps!
2. Scan the QR code to check if everything is correct!
3. Copy the text again in your notebook without any mistakes!

Geography is the study of the Earth's _____, environments, and the relationships between people and their _____. It covers both the physical properties of the Earth's surface and the human _____ spread across it. As a field, geography is divided into two main branches: physical and _____ geography. Physical geography deals with the study of the Earth's surface, including _____, oceans, and ecosystems. Human geography, on the other hand, focuses on the study of _____, their communities, cultures, economies, and interactions with the environment.

One fascinating _____ of geography is how different physical environments, such as mountains, deserts, and _____, shape human activities and cultures. For example, the way people live in the _____ is often quite different from life in the plains or coastal areas. Geography also includes the study of _____, which has a significant impact on how societies develop and interact with the environment. Moreover, _____ helps us understand the importance of location and place in global issues. It provides insights into _____ like economic development, urbanization, and environmental challenges. Understanding the _____ of different regions is also a crucial part of geography, helping us to visualize the Earth's _____ and how different areas are connected.

Another important area of study in geography is the concept of _____ and how they define countries and territories. Borders can be natural, like rivers or _____ ranges, or they can be political, established by human agreements.

Studying geography also involves learning about different _____ and how they have adapted to their environments over time.

In summary, geography is an engaging and diverse _____ that helps us understand our world and our place in it, making it essential for understanding past, _____, and future global issues.
