Another myth suggests that the migrations led to widespread \_\_\_\_\_. While conflicts occurred, many migrant groups also brought with them advances in agriculture and \_\_\_\_\_, contributing to the regions they settled in. The term "Dark Ages" is often used to describe this period, implying a lack of \_\_\_\_\_ and progress. Yet, this overlooks the significant artistic and architectural \_\_\_\_\_ of the time. The notion that Europe's current languages and borders were established during this \_\_\_\_\_ is an oversimplification. The processes were much more complex and unfolded over \_\_\_\_\_.
