Photography

Tasks:

1. Write the words in the correct gaps!
2. Scan the QR code to check if everything is correct!
3. Copy the text again in your notebook without any mistakes!

Photography, a form of _____ and communication, has evolved significantly since its invention. The first photograph, taken in the early 19th century, used a camera _____, a device that projects an image onto a surface. The process was slow and required long _____ times. As technology advanced, so did cameras, becoming more accessible and easier to use. The introduction of the _____ camera revolutionized photography, allowing people to capture and preserve _____ in time.

Color photography added a new _____ to this art form, making images more vivid and realistic. The 20th century saw many advancements, including the development of the _____ (Single Lens Reflex) camera, which offered photographers more control over their shots. The digital _____ brought about a major change, as digital cameras replaced film, offering instant results and easier photo manipulation. This led to the rise of smartphone _____, making it possible for almost anyone to take and share photos instantly.

Photography is not just about capturing what you see. It's about conveying a _____ or emotion through a single image. Different types of photography, like landscape, portrait, and street photography, each have their unique _____ and techniques. Photographers often use elements like lighting, _____, and perspective to create impactful images.

Today, photography is a widespread _____ and a professional career. It plays a crucial role in fields like journalism, _____, advertising, and art. The power of a photograph lies in its ability to freeze a moment in time, tell a story, and evoke emotions, making it a truly powerful medium of _____.

story science art era composition dimension SLR moments styles
hobby exposure expression obscura film photography
