Understanding Heraldic Badges

In the Middle Ages, heraldry was very _____. It was not just about coats of arms; _____ also played a significant role. These badges were symbols used by nobles and knights to represent themselves and their _____. Unlike a coat of arms, which was more formal and strictly regulated, a badge was more _____ and could be simpler in design.

A famous example of a heraldic badge is the _____ used by the House of Lancaster during the Wars of the Roses. Another is the _____ used by Richard III. These symbols were not just for show; they were a way of identifying friends and _____ on the battlefield. Knights and soldiers would wear these badges on their _____, shields, or banners.

One interesting aspect of these badges is how they reflected the _____ or interests of the person they represented. A lord who was known for his bravery might choose a _____, while another who loved hunting could pick a _____. This made each badge unique and deeply _____.

The use of heraldic badges declined after the medieval period, but their influence can still be seen today. Many modern logos and _____ have roots in this ancient tradition. For example, sports teams often use animals or objects as their _____, which is similar to the way medieval knights used badges.

In addition to personal representation, badges also helped in maintaining _____ among followers. By wearing a lord's badge, men showed their allegiance and support. This practice helped in building a sense of _____ and belonging among the members of a noble house.
